Abstract

Was Emmons Wrong?

By Dr. Vince Matthews, Director, Colorado Geological Survey

In his inaugural address to the Colorado Scientific Society in January of 1883, the Society’s first president, Samuel F. Emmons, made some rather strong assertions about the geology and mineral resources of Colorado, to wit:

“In Colorado ….we have coal fields whose extent is probably greater than those of Pennsylvania.”

“In silver, Colorado stands pre-eminent.”

“From a mineralogical point of view, the wealth of Colorado exceeds that of the other states.”

In comparing gold to California: “the field for investigation and for the application of scientific methods is all the larger.”

“For the study of the Archaean … it is safe to say we have nowhere else in the world such opportunities.”

“On all the broad extent of these United States certainly no region can be found which presents more facts of interest, more opportunities for investigation, and greater possibilities of new discoveries than the State of Colorado.”

Given that he had served admirably on the King Survey of the 40th parallel examining the geology in California, Nevada, Idaho, Utah, Wyoming, and Colorado; he appears to have had a good comparative basis upon which to make some of these assertions. But was he right, particularly on the last assertion? Or was he simply engaging in boosterism? This address will attempt to show that his statement is as true today, as it was then.

Colorado Scientific Society President’s Note December 2005

By Vince Matthews

I have always felt that CSS is unique among the numerous geological societies in the Metro Area. The other groups are so narrowly focused, that the talks are usually of only marginal interest to me. But, since I first joined 35 years ago, CSS has offered excellent scientific talks that cover a broad spectrum of the earth sciences. Our field trips are superb. The networking opportunities are extraordinary.

Because I feel so strongly about CSS, it is very hard for me to understand why we aren’t attracting more new members. That is clearly the continuing challenge for our Society. I hope that all of you will turn your ingenuity toward helping us bring in new people. Our survival depends on it.

It is a great honor to have had the privilege of serving as your President this past year. I treasure the opportunity and experience. On the 15th, I turn over the silver-nugget gavel to Chuck Kluth. I first met Chuck two decades ago when we were both serving on the CSS Council. He will do an excellent job as the 123rd president, and I look forward to working with him on the Council in the coming year.
CSS Student Presentation Awards, 2005

There were seven student presentations at November’s meeting. The awards for best papers are:

**First prize**: Timothy MacIntyre, $500; CSM; Fault-related bleaching and sediment-hosted copper mineralization at the Cashin Mine.

**Second prize**: Douglas Kreiner, $250; CSU; Hydrothermal alteration and its effects on slope stability in Alum Creek.

**Third prize**: Thomas Neely, $50; CSU; 3D strain at transitions in foreland arch geometry.

Thanks to all who participated and attended.

CSS Nominations for Officer Positions

At December’s meeting, we will be voting from the floor for 2006 officer positions. The nomination for 2006 President-elect is William Nesse. For councilors, the nominations for the two positions are Scott Minor and John Keller. Nominations will also be taken from the floor.

It’s Time to Pay Dues for 2006

By Don Sweetkind

Membership dues for the coming year (2006) are now due. You will find a dues payment form in this issue of the newsletter. You will also see a reminder in the mail this month. Based on your votes at the end of last year, dues payments have increased $20 for regular members; dues amounts are unchanged for the other dues categories, $10 for corresponding members (outside the Colorado Front Range area), and $5 for students. If you are uncertain of your member status or whether you owe dues, contact CSS Treasurer Don Sweetkind by phone at 303-236-1828 or by e-mail at dsweetkind@usgs.gov

As you pay your dues, please consider making an additional contribution to one of our Memorial Funds (which support our student research grants program) or the Endowment Fund (which we use to defray operating costs). Any contributions made in 2005 (i.e., checks dated before Jan. 1, 2006) will be credited toward the 2005 tax year. Don will send out an acknowledgement receipt to all those members who contributed in 2005 for tax reporting purposes. Please remember that your entire contribution goes towards generating interest for the grants and that your contribution is 100% tax deductible since the Society is a non-profit Section 501 (c)(3) organization.
