

CONTENTS OF VOLUME 12

	Pages
No. 1—Contribution to the geology of the Sangre de Cristo Mountains of Colorado, by J. Harlan Johnson.....	1-22
No. 2—Relation of the ore deposits of the southern Rocky Mountain region to the Colorado Plateau, by B. S. Butler....	23-36
No. 3—Revision of structure and stratigraphy in the Mosquito Range and the Leadville district, Colorado, by Chas. H. Behre, Jr.	37-58
No. 4—Geologic history of the Front Range, Colorado, by T. S. Lovering	59-112
No. 5—Prehistoric cultures of the Cimarron Valley, northeastern New Mexico and western Oklahoma, by E. B. Renaud....	113-50
No. 6—Revision of geologic structure and stratigraphy in the Ouray district of Colorado, and its bearing on ore deposition, by W. S. Burbank.....	151-232
No. 7—Localization of ore in the schists and gneisses of the mineral belt of the Front Range, Colorado, by T. S. Lovering	233-68
No. 8a—Relation of the ore deposits of the southern Rocky Mountain region to the Colorado Plateau; Discussion, by J. B. Tenney.....	269-78
8b—Pillow-lava and the pyrite ores of Cyprus, by Victor Hills	279-88
8c—Corrosion and conservation of buried metal structures, by P. J. Richards.....	289-94
No. 9—Preliminary geologic map of the Alma Mining district, Colorado, by Quentin D. Singewald and B. S. Butler.....	295-308
No. 10—The Climax molybdenum deposit of Colorado, by B. S. Butler and John W. Vanderwilt, with section on history, production, metallurgy and development, by Chas. W. Henderson	309-54
No. 11a—The paleontology of the Denver quadrangle, Colorado, by J. Harlan Johnson.....	355-78
11b—General correlation and synchrony of Colorado ore deposits, by John Wellington Finch.....	379-88
No. 12a—Preliminary report on the geology of Mount Lincoln and the Russia Mine, Park County, Colorado, by Quentin D. Singewald and B. S. Butler.....	389-406
12b—Localization of ore bodies at Rico and Red Mountain, Colorado, as conditioned by geologic structure and history, by George E. Collins.....	407-24
Index—By Margaret Blakely.....	425-87

IV

ILLUSTRATIONS

	Pages
No. 1	
Figure 1—Typical conglomerate of upper Sangre de Cristo series— Crestone Canyon northeast of Crestone.....	opp. 10
Figure 2—Intraformational unconformity within Sangre de Cristo formation—east of Mosca Pass.....	opp. 10
Map —Middle Pennsylvanian land areas.....	18
No. 2	
Plate I —Mining districts around Colorado Plateau.....	opp. 28
No. 3	
Figure 1—Map of faults in Iowa Gulch district.....	39
Figure 2—Stratigraphic column of Iowa Gulch district.....	40
Figure 3—East-West section through Hellena shaft, in part after C. W. Jordan.....	44
Figure 4—Section through stopes in the Continental Chief mine	48
Figure 5—Azimuth circle showing strikes of 77 pre-mineral fis- sures in the Continental Chief mine.....	49
Figure 6—Sketch of ore in stope wall, Continental Chief mine...	50
Figure 7—Plan of stope on intermediate level, Continentel Chief mine	51
Figure 8—Section north 25° east, through IbeX No. 2 shaft.....	54
No. 4	
Figure 1—Paleographic map of Cambrian and Ordovician rocks of Colorado	76
Figure 2—Paleographic map of Devonian and Mississippian rocks of Colorado	79
Figure 3—Paleographic map of Pennsylvanian and Permian rocks of Colorado	80
Figure 4—Paleographic map of the Triassic and Jurassic rocks of Colorado	85
Figure 5—Paleographic map of the Cretaceous Dakota sandstone in Colorado	88
Figure 6—Diagrammatic section showing general relations of the pre-Tertiary formations of the Front Range in Den- ver time	95
Figure 7—Section at Horse Creek, Wyoming, showing present and restored ancient surfaces of Tertiary beds, from Greentop Mountain at the left to northeast corner Sec. 1, T. 16 N., R. 69 W.....	108
No. 5	
Map —Cimarron Valley, northeastern New Mexico and west- ern Oklahoma, locations and finds.....	116
Figures	
Finds from caves 3, 5, 6, and "fumarole".....	120
Finds from cave 1.....	125-29
Finds from cave 3.....	130
Finds from caves 5, 6, and 7.....	131
Finds from caves 2 and 3.....	132

ILLUSTRATIONS

	Finds from caves 5 and 7.....	137
	Finds from cave 6.....	140, 143
	Finds from cave 7.....	144
No. 6		
	Plate I —Generalized geologic map and sections of the Ouray mining district, Ouray County, Colorado.....	154
	Plate II —Stratigraphic sections of the rocks of the Ouray mining district	155
	Figure 1—Restoration of geologic conditions in late Upper Cretaceous time, showing the probable relation of the Ouray stock and its associated mineral deposits to the Upper Cretaceous formations or early Eocene time	168
	Figure 2—Longitudinal section along the Bachelor vein and clastic dike	198
	Figure 3—Longitudinal and transverse sections along part of the Calliope vein to illustrate the unconformity at the base of the Tertiary volcanic rocks, and its relation to the late Cretaceous veins.....	199
	Figure 4—Plan and section of the Mineral Farm mine and ore body	221
	Figure 5—Plan, longitudinal section, and cross-section of the Pony Express mine, illustrating lateral replacement of beds of ore near fissure veins.....	224
No. 7		
	Plate I —Geologic map of the Front Range, Colorado.....	235
	Figure 1—Effect of a bed of quartzite on a small fault, cutting interbedded shale and quartzite.....	245
	Figure 2—Occurrence of ore shoots where vein breaks across schistosity	246
	Figure 3—Diagrammatic section along the Argo adit from Portal at Idaho Springs to end near Central City, Colorado	249
No. 8a		
	Map —Sketch map of Colorado Plateau showing geosynclines and positive elements.....	272
8b		
	Plate I —Sack-like or pillow-form structure in diabase lava of Arenig age	280
	Plate II —Pillowy lavas of Arenig age with interstices filled with limestone and chert.....	281
	Plate III—Pillow-lava at a seashore cliff on Morphou Bay, island of Cyprus	284
	Plate IV—Pillow-lava formation in the andesite below the ore body at the 820-foot level of the Skouriotissa mine, Cyprus.....	284
No. 9		
	Figure 1—General stratigraphic column of the Alma district, Colorado	296

VI

ILLUSTRATIONS

Figure 2—Chart showing trend and relative intensity of fissuring and “minor” faulting, in the Alma district, Colorado	305
Figure 3—Chart showing approximate age relationship of mineralization, intrusion, and faulting, in the Alma district, Colorado	306
No. 10	
Map —Map [geologic] of Climax mining district, Colorado	opp. 322
Figure 1—Stereogram showing generalized relations of different zones of the Climax molybdenum deposit.....	336
Figure 2—Oxides in grams per cubic centimeter in unaltered and altered Silver Plume granite from the Climax mining district	339
No. 12a	
Figure 1—Index map of central Colorado showing location of Mt. Lincoln area.....	390
Figure 2—Stratigraphic column for Mt. Lincoln.....	392
Plate I —Geologic map, Mt. Lincoln and vicinity, Mosquito Range, Park County, Colorado.....	opp. 394
Figure 3—Chart showing trend and relative intensity of fissuring in Mount Lincoln area.....	397
Figure 4—Relative ages of faulting, intrusion, and mineralization	397
Plate II —Russia mine, Mt. Lincoln, Park County, Colorado.....	402
